NAVIGATION'S WHAT YOU NEED

General Navigation

Championship Manager on the PSP™ has had it's interface designed from the ground up with the ease of use in mind. Use the directional buttons or the analog stick to move the highlight around the various selectable on-screen objects.

Standard Button

On screen buttons can be selected by pressing the ✕ button when highlighted. For example, selecting the Continue button causes the game to progress to the next significant event.

Pop-up/Drop-down Menu Button

For certain options and buttons, pop-up menus are displayed. These menus can then be traversed using the direction buttons or the analog stick and a selection is made from the menu using the ✕ button.

To close a pop-up menu without making a selection, press the △ button.

Player or Team Name Hyperlink

An underlined name or word indicates that, upon selection with the ✕ button, the user will be taken to a screen related to that name. For example, pressing the ✕ button over the Ronaldo, C hyperlink will take you to Christiano Ronaldo's Player Profile Screen.

Menu Bar

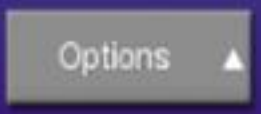
At any point in the game, you can bring up the **Menu Bar** by pressing the button. The **Menu Bar** is the navigational centre of CM2006 and it allows you to move between the various day to day screens as well as access options screens and save your game.

Squad
Takes you to your team's senior Squad Screen

'Manager Name'
Opens up a list of screens you can visit that pertain to you as manager. Includes search screens, manager options, squad screens and the News Screen among others.

Competitions
Through a pop-up list, this button allows you to see information about each of the major competitions in the domestic leagues around you as well as the wider football world in general.

Clubs
Opens a drop-down list that allows you to quickly access various other club and national teams' Squad and Information screens.



Options
Allows you to change your preferences, check your place in the Hall of Fame and importantly, Save your game.
